Why Homeowners Are Urged to Hire ECA(SA) Registered Electricians

Electrical safety in South African homes is under the spotlight, with industry leaders stressing the importance of hiring contractors registered with the Electrical Contractors Association of South Africa (ECA(SA)). Experts warn that cutting corners on electrical work can put families, properties, and investments at risk.

Upholding Professional Standards

ECA(SA) member electricians are bound by strict industry regulations and undergo continuous training to stay updated on evolving safety codes. Their work is guaranteed to meet compliance requirements set by South African law, offering homeowners peace of mind that installations are both safe and legal.

Proof of Registration

Before any project begins, homeowners are advised to request the electrician's Department of Labour (DOL) registration letter. This official document confirms that the contractor is legally authorised to perform electrical work. An expired or missing registration is considered a warning sign that the electrician may not meet professional standards.

The Risks of Cutting Corners

Industry experts caution that using unregistered or unqualified electricians can lead to dangerous installations, costly repairs, and even rejected insurance claims. In contrast, ECA(SA) members provide assurance that work will be completed correctly the first time, in line with all safety and compliance regulations.

Setting the Standard

"Choose safety. Choose quality – Choose an ECA(SA) member," the association emphasised in a recent statement. With its motto Hands of Safety, ECA(SA) continues to position itself as the benchmark for electrical excellence in South Africa.

ANSWER THE CALL. GIVE BLOOD. GIVE HOPE.

THE IMPORTANCE OF BLOOD DONATION

The South African National Blood Service (SANBS) is calling on donor across Bloemfontein to roll up their sleeves and donate blood, to help boost blood stock levels and save lives.

Hospitals rely on a stable blood supply to treat trauma patients, mothers experiencing childbirth complications, cancer patients undergoing chemotherapy, and children living with blood disorders. However, blood stocks often come under pressure due to seasonal slowdowns and reduced donor turnout.

The SANBS encourages first-time donors, inspire regular donors to continue donating, and build a strong culture of blood donors across South Africa.

WHO CAN DONATE

Healthy individuals aged 16 to 75, weighing 50kg or more, may be eligible to donate blood. The donation process is safe, simple and takes approximately 30 minutes.

A single blood donation can save up to three lives, as each unit of blood is separated into red blood cells, plasma and platelets to assist multiple patients.

WHERE TO DONATE

BENADERYLAAN 133

Waarom dit belangrik is dat kinders fisiese boeke lees.

In n wêreld waar selfone, tablette en rekenaars al hoe meer deel van kinders se daaglikse lewe word, bly fisiese boeke steeds 'n baie belangrike hulpmiddel vir leer en ontwikkeling. Om 'n boek in die hand te hou en self die bladsye om te blaai, bied 'n ervaring wat geen skerm volledig kan vervang nie.

Eerstens help fisiese boeke kinders om beter te konsentreer. Wanneer 'n kind 'n boek lees, is daar nie kennisgewings, speletjies of ander digitale afleiding nie. Dit maak dit makliker vir kinders om langer op een storie of onderwerp te fokus. Hierdie vaardigheid van konsentrasie help hulle nie net met lees nie, maar ook met skoolwerk en ander leer aktiwiteite.

Tweedens ontwikkel lees uit fisiese boeke kinders se verbeelding. Wanneer 'n kind 'n storie lees, moet hy of sy self die karakters, plekke en gebeure in hul gedagtes voorstel. Hierdie proses stimuleer kreatiewe denke en help kinders om hul verbeeldingskrag te ontwikkel, wat baie belangrik is vir probleemoplossing en kreatiwiteit later in die lewe.

Nog 'n belangrike voordeel is dat fisiese boeke 'n beter begrip van die teks kan bevorder. Studies toon dat baie lesers inligting makliker onthou wanneer hulle van papier lees eerder as van 'n skerm. Die gevoel van die boek, die sien van hoeveel bladsye reeds gelees is en waar in die boek 'n sekere gedeelte was, help die brein om die inligting beter te organiseer en te onthou.

Fisiese boeke help ook om 'n liefde vir lees te ontwikkel. Die ervaring van 'n biblioteekbesoek, 'n boek kies, dit huis toe neem en rustig lees, skep 'n spesiale verhouding tussen die kind en boek. Hierdie positiewe ervaring kan 'n lewenslange leesgewoonte aanmoedig.

Verder speel fisiese boeke 'n belangrike rol in kinders se emosionele en taalontwikkeling. Deur stories leer kinders nuwe woorde, beter taalgebruik en verskillende perspektiewe oor die wêreld. Stories kan ook empatie ontwikkel omdat kinders leer om hulself in ander mense se situasie in te dink.

Alhoewel tegnologie baie voordele het, moet fisiese boeke steeds 'n belangrike plek in kinders se opvoeding hê. Om 'n boek in die hand te hou, stadig deur die bladsy te lees en in storie te verdiep, bly een van die beste maniere om kennis, verbeelding en 'n liefde vir lees te ontwikkel. Daarom is dit noodsaaklik dat kinders aangemoedig word om gereeld fisiese boeke te lees.

RARE HOBBIES

THE WORLD OF BRICK COLLECTING

In a world obsessed with digital collectibles and modern memorabilia, a quiet but passionate community of hobbyists is digging through demolition sites, scouring old farmsteads, and trading at flea markets in pursuit of something altogether more solid — the humble brick.

A GLOBAL HOBBY WITH DEEP ROOTS

Brick collecting, sometimes called "brickophilia," has enthusiasts across the United Kingdom, United States, Australia, and continental Europe. Collectors seek out bricks stamped with the names of long-defunct brickworks, unusual glazes, rare colours, or distinctive maker's marks pressed into the clay before firing. In the UK alone, thousands of collectors catalogue bricks from Victorian-era manufacturers, preserving a tangible record of the Industrial Revolution. Online communities, dedicated Facebook groups, and annual swap meets have transformed what was once a solitary pastime into a thriving global network.

SOUTH AFRICA'S BRICK HERITAGE

South Africa has a rich brickmaking history stretching back to the early Cape Colony, and local collectors are beginning to document it seriously. Old bricks stamped with names like "De Beers," "Daspoort," or various Witwatersrand brickworks from the mining era are highly sought after. Farmstead demolitions across the Karoo and Free State often yield beautifully weathered specimens that date back over a century.

Collectors in cities like Johannesburg, Cape Town, and Bloemfontein have started forming informal networks, sharing finds at markets and through social media. As urban development accelerates and old structures are razed, the urgency to preserve these fired clay witnesses to South African history has never been greater.

For those bitten by the bug, the advice is simple: look down — history is literally underfoot.

The Flu Vaccine

Autumn is here — and flu season is on its way. The best time to vaccinate in South Africa is March to May, before winter peaks.

- Flu vaccines are recommended annually, especially for those over 65, pregnant women, and children.
- You cannot get flu from the vaccine — it contains inactivated virus particles only.
- QuintaMed offers flu vaccinations by appointment.

A simple annual jab is one of the greatest gifts you can give your family this winter. ❄️
